- 10/00

Geothermal collectors
- 10/10

• with circulation of working fluids through underground channels, the working fluids not coming into direct contact with the ground
- 10/13

• • using tube assemblies suitable for insertion into boreholes in the ground, e.g. geothermal probes
- 10/15

• • • using bent tubes; using tubes assembled with connectors or with return headers
- 10/17

• • • using tubes closed at one end, i.e. return-type tubes
- 10/20

• using underground water as working fluid; using working fluid injected directly into the ground, e.g. using injection wells and recovery wells
- 10/30

• using underground reservoirs for accumulating working fluids or intermediate fluids
- 10/40

• operated without external energy sources, e.g. using thermosiphonic circulation or heat pipes
